

A Psychological and Academic Perspective on Evidence-Based Advocacy and Gender- Responsive Policy

- **PhD Rozeta Paskalieva**

psychologist and university professor
MIT University
Macedonia

Introduction: From Budget Figures to Human Lives

What if we measured gender inequality not only by the number of women in parliament, their income, or their employment rate, but also by how much time a woman has for herself, for education, for professional development, for rest, for health, and for participation in public life.

- 1. The Invisible Economy of Care**
- 2. Why Psychology Must Be Part of This Discussion**
- 3. Why Should Universities and Civil Society Organizations Work Together?**
- 4. From "Research on Women" to "Research With Women"**

5. From Evidence to Budget Decisions

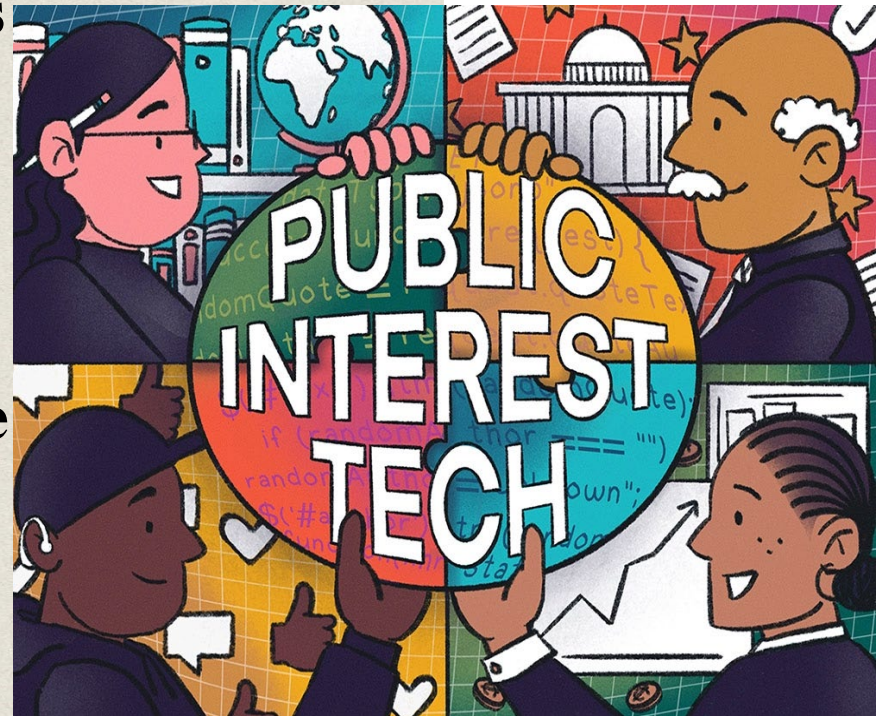

6. North Macedonia:

The Foundations Already Exist

7. The University as an Infrastructure of Public Interest

8. Gender and the Climate Crisis:

A New Field for Interdisciplinary Collaboration

From Budget Allocation to Psychological Well-Being

Conclusion: The Most Important Question Is Not
"Do We Have Data?"
